

Goodreads Plus

Team of 1: Max Patiiuk

Problem

- I love listening to audiobooks.
- Goodreads is the most popular “book social media” out there.
 - Allows tracking read dates and rating books
- As a computer scientist, I also want to data mine my hobby to gain insights.
- Unfortunately, Goodreads is quite stagnant and lacks useful data export feature.
 - They had public APIs, but those have been removed a few years ago.
 - They have an RSS feed and a takeout option, but those provide limited data and aren't convenient to use

Solution

A Google Chrome extension that:

- Adds an easy data export feature to Goodreads
- Adds powerful plotting functionality
- Adds comprehensive book search (Goodreads' search is infamously bad)
